B.java

```

package a.b.c;
class B {
    p.s.v. main() {
        A a = new A();
        S.op(a.y);
    }
}
    
```

D.java

```

package m.n;
import a.b.c.A;
class D {
    p.s.v. main() {
        A a = new A();
        S.op(a.y);
    }
}
    
```

C.java

```

package a.b.c;
class C extends A {
    p.s.v. main() {
        C c = new C();
        S.op(c.y);
    }
}
    
```

A.java

```

package a.b.c;
public class A {
    // int y = 11;
}
    
```

E.java

```

package m.n;
import a.b.c.A;
class E extends A {
    p.s.v. main() {
        E e = new E();
        S.op(e.y);
    }
}
    
```
